

With all due respect, I wish to use this opportunity to voice my concern about the push by the NAB to quiet XM radio. I became aware of this technology upon purchase of my car, and I must say, I was and still am very pleased with the service.

The breadth and quality of programming available is first rate and it would be a terrible shame if we as paying subscribers and other potential consumers of this great product are deprived of such a pleasure in order to satisfy the big corporate interests.

Sincerely,  
U. Ojiaku
